Timetables of World Literature - George Thomas Kurian 2003
Which authors were contemporaries of Charles Dickens? Which books, plays, and poems were published during World War II? Who won the Pulitzer Prize in the year you were born? Timetables of World Literature is a chronicle of literature from ancient times through the 20th century. It answers the question "Who wrote what when?" and allows readers to place authors and their works in the context of their times. A chronology of the best in global writing, this valuable resource lists more than 12,000 titles and 9,800 authors, includes all genres of literature from more than 58 countries, and covers 41 languages. It is divided into seven sections, spanning the Classical Age (to 100 CE), the Middle Ages (100-1500 CE), and the 16th through the 20th centuries. Comprehensive in scope, Timetables of World Literature provides students, researchers, and browsers with basic facts and a worldwide perspective on literature through time. Four extensive indexes by author, title, language/nationality, and genre make research quick and easy. Features include: Birth and death dates as well as nationalities of authors and other literary figures
Winners of major literary prizes and awards, such as the Nobel Prize in Literature and the Pulitzer Prizes, for each year
Brief discussions of literary developments in each period or century,

and the relationship of literature to the social and political climate
Timelines of key historical events in each century.

The Periplus of the Erythraean Sea - Hakluyt Society 1980
The Periplus of the Erythraean Sea is a short work of uncertain date and unknown authorship, written in very difficult Greek. It is concerned with the coasts of the Red Sea and -Indian Ocean and may be described as a combined trade directory and Admiralty Handbook, giving sailing directions and information about navigational hazards, harbours, imports and exports. It is of great value for the study of the commerce of the Roman Empire and the early history of East Africa, South Arabia and India. This is a new

print-on-demand hardback edition of the volume first published in 1980.

European Studies in Asia - Georg Wiessala 2014-03-21

As countries across Asia continue to rise and become more assertive global powers, the role that Higher Education has played, and continues to play, in this process is an issue of growing pertinence. Furthermore, understanding the relationship between Europe and Asia fostered by historical and contemporary knowledge transfer, including Higher Education, is crucial to analysing and encouraging the progress of both regional integration and inter-regional cooperation. With a specific focus on international Higher Education, *European Studies in Asia* investigates knowledge transfer and channels of learning between Europe and Asia from historical, contemporary and teaching perspectives. The book examines a selection of significant historical precedents of intellectual dialogue between the two regions and, in turn, explores contemporary cross-regional discourses both inside and outside of the official frameworks of the European Union (EU) and the Asia--Europe Meetings (ASEM). Drawing on extensive case studies based on many of his own teaching experiences, Georg Wiessala addresses key questions, such as the nature and construction of the European Studies in Asia curriculum; aspects of 'values', co-constructed learning and adult pedagogy in the discipline of European Studies in Asia; the politics of Asian host cultures, the 'internationalization' of Asian Higher Education and the experiences and expectations of tertiary sector students of this subject in Asia, Australia and New Zealand. In doing so, the author articulates a range of outcomes for the further development of Higher Education cooperation agendas between Asia and Europe, in the discipline of European Studies, and in related fields such as International Relations. This case study-led book makes an original and novel contribution to our understanding of European Studies in Asia. As such, it will be of great interest to students and scholars of Asian Education,

Comparative Education, European Studies and International Relations.

Africa's Development in Historical Perspective - Emmanuel Akyeampong 2014-08-11

Why has Africa remained persistently poor over its recorded history? Has Africa always been poor? What has been the nature of Africa's poverty and how do we explain its origins? This volume takes a necessary interdisciplinary approach to these questions by bringing together perspectives from archaeology, linguistics, history, anthropology, political science, and economics. Several contributors note that Africa's development was at par with many areas of Europe in the first millennium of the Common Era. Why Africa fell behind is a key theme in this volume, with insights that should inform Africa's developmental strategies.

African Cosmology of the Bantu-Kôngo - Kimbwandènde Kia Bunseki Fu-Kiau 2001

"Life is fundamentally a process of perpetual and mutual communication; and to communicate is to emit and to receive waves and radiations (minika ye minienie). This process of, receiving and releasing or passing them on (tambula ye tambikisa) is the key to human beings game of survival. A person is perpetually bathed by radiations' weight, (zitu kia minienie). The

weight (zitu/demo) of radiations may have a negative as well as positive impact on any tiny being, for example a person who represents the most vibrating: "kolo" (knot) of relationships." "The following expressions are very common among the Bantu, in general, and among the Kongo in particular, which prove to us the antiquity of these concepts in the African continent; Our businesses are waved/shaken; our health is waved/shaken; what we possess is waved/shaken; the communities are waved/shaken: Where are these (negative) waves coming from (Salu bieto bieti nikunwa; mavimpi nikunwa; biltuvwidi nikunwa; makanda nikunwa: Kwe kutukanga minika miami)?" "For the Bantu, a person lives and moves within an ocean of waves/radiations. One is sensitive or immune to them. To be sensitive to waves is to be able to react negatively or positively to those waves/forces. But to be immune to surrounding waves/forces, is to be less reactive to them or not at all. These differences account for varying degrees in the process of knowing/learning among individuals" --BOOK Cover.

Dialogue Concerning the Two Chief World Systems - Galileo 2001-10-02

Galileo's Dialogue Concerning the Two Chief World Systems, published in Florence in 1632, was the most proximate cause of his being brought to trial before the Inquisition. Using the dialogue form, a genre common in classical philosophical works, Galileo masterfully demonstrates the truth of the Copernican system over the Ptolemaic one, proving, for the first time, that the earth revolves around the sun. Its influence is incalculable. The Dialogue is not only one of the most important scientific treatises ever written, but a work of supreme clarity and accessibility, remaining as readable now as when it was first published. This edition uses the definitive text established by the University of California Press, in Stillman Drake's translation, and includes a Foreword by Albert Einstein and a new Introduction by J. L. Heilbron.

The First Voyage Around the World, 1519-1522 - Antonio Pigafetta 2007-01-01

The First Voyage around the World is also a remarkably accurate ethnographic and geographical account of the circumnavigation, and one that has earned its reputation among modern historiographers and students of the early contacts between Europe and the East Indies.

The Spanish Lake - Oskar Hermann Khristian Spate 2004-11-01

This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva España and Peru were the bases from which the ocean was turned into virtually a Spanish lake.

Empire's Crossroads - Carrie Gibson 2014-11-11

A “wide-ranging, vivid” narrative history of one of the most coveted and complex regions of the world: the Caribbean (The Observer). Ever since Christopher Columbus stepped off the Santa Maria and announced that he had arrived in the Orient, the Caribbean has been a stage for projected fantasies and competition between world powers. In *Empire’s Crossroads*, British American historian Carrie Gibson offers a panoramic view of the region from the northern rim of South America up to Cuba and its rich, important history. After that fateful landing in 1492, the British, French, Spanish, Portuguese, Dutch, Danish, and even the Swedes, Scots, and Germans sought their fortunes in the islands for the next two centuries. These fraught years gave way to a booming age of sugar, horrendous slavery, and extravagant wealth, as well as the Haitian Revolution and the long struggles for independence that ushered in the modern era. Gibson tells not only of imperial expansion—European and American—but also of life as it is lived in the islands, from before Columbus through the tumultuous twentieth century. Told “in fluid, colorful prose peppered with telling anecdotes,” *Empire’s Crossroads* provides an essential account of five centuries of history (Foreign Affairs). “Judicious, readable and extremely well-informed . . . Too many people know the Caribbean only as a tourist destination; [Gibson] takes us, instead, into its fascinating, complex and often tragic past. No vacation there will ever feel quite the same again.” —Adam Hochschild, author of *To End All Wars* and *King Leopold’s Ghost*

Conquerors - Roger Crowley 2015-09-15

As remarkable as Columbus and the conquistador expeditions, the history of Portuguese exploration is now almost forgotten. But Portugal's navigators cracked the code of the Atlantic winds, launched the expedition of Vasco da Gama to India and beat the Spanish to the spice kingdoms of the East - then set about creating the first long-range maritime empire. In an astonishing blitz of thirty years, a handful of visionary and utterly ruthless

empire builders, with few resources but breathtaking ambition, attempted to seize the Indian Ocean, destroy Islam and take control of world trade. Told with Roger Crowley's customary skill and verve, this is narrative history at its most vivid - a epic tale of navigation, trade and technology, money and religious zealotry, political diplomacy and espionage, sea battles and shipwrecks, endurance, courage and terrifying brutality. Drawing on extensive first-hand accounts, it brings to life the exploits of an extraordinary band of conquerors - men such as Afonso de Albuquerque, the first European since Alexander the Great to found an Asian empire - who set in motion five hundred years of European colonisation and unleashed the forces of globalisation.

The Shape of Things to Come - H. G. Wells 2016-09-14

First published in 1933, "The Shape of Things to Come" is science fiction novel written by H. G. Wells. Within it, world events between 1933 and 2106 are speculated with a single superstate representing the solution to all humanity's problems. A classic example of Wellsian prophesy, this volume is highly recommended for fans of his work and of the science fiction genre. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the

author.

Expédition française sur les récifs coralliens de la Nouvelle-Calédonie: Mémoires de V. Apostolescu ... [et al - 1967

The Portuguese in West Africa, 1415-1670 - Malyn Newitt
2010-06-28

The Portuguese in West Africa, 1415-1670 brings together a collection of documents - all in new English translation - that illustrate aspects of the encounters between the Portuguese and the peoples of North and West Africa in the period from 1400 to 1650. This period witnessed the diaspora of the Sephardic Jews, the emigration of Portuguese to West Africa and the islands, and the beginnings of the black diaspora associated with the slave trade. The documents show how the Portuguese tried to understand the societies with which they came into contact and to reconcile their experience with the myths and legends inherited from classical and medieval learning. They also show how Africans reacted to the coming of Europeans, adapting Christian ideas to local beliefs and making use of exotic imports and European technologies. The documents also describe the evolution of the black Portuguese communities in Guinea and the islands, as well as the slave trade and the way that it was organized, understood, and justified.

Seven Myths of the Spanish Conquest - Matthew Restall
2021-04-13

An update of a popular work that takes on the myths of the Spanish Conquest of the Americas, featuring a new afterword. Seven Myths of the Spanish Conquest reveals how the Spanish invasions in the Americas have been conceived and presented, misrepresented and misunderstood, in the five centuries since Columbus first crossed the Atlantic. This book is a unique and provocative synthesis of ideas and themes that were for generations debated or perpetuated without question in academic and popular circles. The 2003 edition became the foundation stone of a scholarly turn since called The New Conquest History. Each of the book's seven chapters describes one "myth," or one aspect of the Conquest that has been distorted or misrepresented, examines its roots, and explodes its fallacies and misconceptions. Using a wide array of primary and secondary sources, written in a scholarly but readable style, Seven Myths of the Spanish Conquest explains why Columbus did not set out to prove the world was round, the conquistadors were not soldiers, the native Americans did not take them for gods, Cortés did not have a unique vision of conquest procedure, and handfuls of vastly outnumbered Spaniards did not bring down great empires with stunning rapidity. Conquest realities were more complex--and far more fascinating--than conventional histories have related, and they featured a more diverse cast of protagonists-Spanish, Native American, and African. This updated edition of a key event in the history of the Americas critically examines the book's arguments, how they have held up, and why they prompted the rise of a New Conquest

History.

Sundaland: Tracing The Cradle of Civilizations - Dhani Irwanto 2019-02-22

Sundaland is a bio-geographical region of Southeastern Asia which encompasses the Sunda Shelf, the part of the Asian continental shelf that was exposed during the Last Ice Age. It included the Malay Peninsula on the Asian mainland, as well as the large islands of Kalimantan, Java and Sumatera, and their surrounding islands. Sundaland is in the tropics, surrounded by oceans, and within the Ring of Fire. Benefitting from the heavy precipitation, volcanic deposits in Sundaland develop into some of the richest forestry and agricultural lands, and developed into some of the richest fauna on Earth. The vast majority of scholars accept that every living human being is descended from a small group in Africa, who then dispersed into the wider world. Archaeological and fossil evidence support an early migration of modern humans left Africa and followed the coastlines of Africa, Arabia, India and Sundaland. After migrating from the semi-deserted savannas of Africa, man first found a place in Sundaland where food was abundant and it was there that they left hunter-gatherer culture and invented farming, agriculture, trading and civilization, which made humanity first flourished. All this took place during the Last Glacial period. The sea levels continued to rise gradually to peak levels about 5,500 years ago, causing land loss on tropical coasts with flat continental shelves. Cracks in the earth's crust as the weight of the ice shifted to the seas set off catastrophic events compounded by earthquakes, volcano eruptions, super waves and floods drowned the coastal cultures and all the flat continental shelves of Southeast Asia, and wiped out many populations. As the sea rolled in, there was a mass migration from the sinking continent. Genetic studies show that there has been a sharp decline in the population of the world, and population turnovers from Southeast, East and South Asia to Europe, Near East and the Caucasus beginning at the the end of the Younger Dryas period.

The Younger Dryas disasters are also documented as legends, myths or tales in almost every region on Earth, observable with tremendous similarities. They are common across a wide range of cultures, extending back into Bronze Age and Neolithic prehistory. The overwhelming consistency among legends and myths of flood and the repopulation of man from a flood hero similar to the Noah Flood are found in distant parts of the Earth. The myths similar to the Garden of Eden, Paradise or Divine Land echo among the populations around the world. Memories of their origin are documented in their legends, such as the stories of Atlantis, Neserser, Land of Punt, Land of Ophir, Kumari Kandam, Kangdez and Taprobana. Pyramids spread in many parts of the world and emerged separately from one another by oceans who supposedly never discovered each other's existence. Those indicate that they were derived from a common origin. Further, scholastic belief by etymologists and linguists are positive that all world languages sprang from a common source.

Kingdoms in Conflict - Charles W. Colson 1989-01-27

"...Definitely worth reading" -Billy Graham "Colson's criticisms of the Religious Right are especially noteworthy...Colson's warnings echo a concern that religious conservatives would be reckless to ignore." -Richard N. Ostling, Religion Editor, Time "The timing could hardly be better for an author with a new book." -Newsweek "Kingdoms in Conflict speaks with wisdom and "guts" to the major issues of our day." -Charles R. Swindoll "Kingdoms in Conflict is a classic that belongs on every Christian's bookshelf." -Dr. James C. Dobson "This was a book waiting for Chuck Colson to write. As no other evangelical author can, Colson brings his political experience, thoroughly changed life, and lucid writing together at just the right time..." -Moody Monthly "The arguments- church-state, the correct admixture between the two- are familiar grist for controversial mills, but Colson does wonderful theatrical instruction in his book..." - William F. Buckley, Jr. "In Kingdoms in Conflict Charles W. Colson masterfully weds the two subjects he

knows best- politics and Christian faith." -Russell Chandler "Kingdoms in Conflict offers a welcomed new insight into an age-old question." - Jack Anderson "One cannot be a passive reader of Chuck Colson's Kingdoms in Conflict." -Mark O. Hatfield *The Companion Guide to the South of Spain* - Alfonso Lowe 2000 I value the traditional virtues of the Companion Guides... actually written by an individual rather than packaged by production teams... straightforward intelligent guides to cultural sites. BOOKSELLER Andalucia in its heyday, after the invasion of the Moors in 711, was famous for its wealth and fertility, and the province's Moorish character remains distinct; even before the Moors, the Phoenicians, the Romans and the Vandals had all been drawn to this beautiful land. The Moors cultivated science and the arts, and their influence was felt throughout western Europe - in the songs of the troubadours, the poems of Dante and the discoveries of Copernicus; their merchants enriched the province; their courtiers and architects set new standards of luxurious living. This glory finally ended in 1492, when the Christian armies of the Reconquista entered Granada, but much remains in the three Moorish towns of Cordoba, Seville and Granada, and the country round about, to recall the great times. Alfonso Lowe is an admirable guide, from the intricacies of the distinction between Mozarabic and Mudejar Moorish styles to the characteristic dishes to be found in restaurants and bars - and to the adjacent territories of Murcia and the greater part of Alicante.
