**See the World** - 2005

"A fun introduction to world geography"--  
Cover

**World Atlas - Continents & Oceans** - My  
Ebook Publishing House 2016-11-08

Africa, the Americas, Antarctica, Asia, Australia together with Oceania, and Europe are considered to be Continents. The term continent is used to differentiate between the various large areas of the earth into which the land surface is divided. So, a continent is "a large, continuous area of land on Earth." All continents together constitute less than one-third of the earth's surface, that means more than two-thirds of the earth's surface are covered with water. The book contains outstanding maps that help children learn the continents and oceans of the world.

*Map Skills Asia (eBook)* - R. Scott House  
2010-09-01

Explore the varied features of the Asian continent while reinforcing basic map reading skills. Sixteen student pages and accompanying blackline and full-color maps coordinate to provide a relational study of the elevation, vegetation, products, population, and peoples of Asia. Full-color maps are provided as transparencies for print books and PowerPoint slides for eBooks. Student pages challenge students to combine maps and additional resources in order to answer questions and make judgments. Question topics follow the Five Themes of Geography as outlined by the National Geographic Society: finding absolute and relative locations on a map, relating physical and human characteristics to an area, understanding human relationships to the environment, tracing movement of peoples and goods throughout an area, and organizing countries and continents into regions for detailed study.

**Geography Songs** - Kathy Troxel 2004

Bodies and Maps - Maryanne Cline Horowitz 2020-12-15

An exploration of the ways early modern European artists have visualized continents through the female (sometimes male) body to express their perceptions of newly encountered peoples. Often stereotypical, these personifications are however more complex than what they seem.

**North Americ** - Wendy Vierow 2004-01-01

This seven-book series is a user's guide to locating Earth's continents and the countries of the world. Kids will learn that more than 200 million years ago, all continents began as part of Pangaea, a supercontinent that broke up to form seven continents. They will acquire map-reading skills by learning the directions in which longitude and latitude lines point, where the equator is, and what the prime meridian is. The final chapter in each book features a scientist, related to the continent, with specialties that range from dinosaurs to the study of volcanoes. North America is a continent of many natural wonders. It has the longest coastline of any continent in the world at 190,000 miles, including the island of Greenland and the Caribbean islands. It has two of the world's major mountain ranges: the Appalachians in the east and the Rocky Mountains in the west. North America contains every kind of climate on Earth, from frozen tundra to tropical

wetlands. It has sunny beaches and arid deserts. It contains 23 countries, including Canada, the second largest country in area on Earth, the United States, and Mexico.
