PHTLS: Prähospital Trauma-Lebenshilfe, Neunte Ausgabe - National Association of Emergency Medical Technicians 2019-12-14

Im Feld zählen Sekunden. PHTLS: Die präklinische Trauma-Lebenshilfe lehrt und bekräftigt die Grundsätze der schnellen Beurteilung eines Trauma-Patienten durch einen ordentlichen Ansatz, die sofort lebensbedrohliche Probleme behandelt, sobald sie identifiziert werden, und eventuelle Verzögerungen bei der Einleitung des Transports zu einem geeigneten Ziel auf ein Minimum reduziert. Entwickelt von der Nationalen Vereinigung der Rettungssanitäter (NAEMT) in Zusammenarbeit mit dem American College of Surgeons Committee on Trauma (ASC-COT), PHTLS, neunte Edition reflektiert aktuelles, evidenzbasiertes Wissen und Praxis und fördert kritisches Denken als Grundlage für die Bereitstellung hochwertiger Pflege. Die schnelle Beurteilung eines Trauma-Patienten zur Identifizierung einer lebensrettenden Behandlung ist das Herzstück der neunten Edition von PHTLS.

Es dauert 2 Minuten oder weniger, bis ein Patient ausblutet. Keine andere Vorsorgeeinrichtung für interventionelle präklinische Behandlung ist wichtiger als das Anhalten dieses Blutungsgrads bei Trauma-Patienten. Um dies zu reflektieren, verwendet PHTLS, neunte Edition die XABCDE-Patientenbeurteilungs-Mnemonik, um die Ausblutungs-?ämorrhagie bei jedem einzelnen Patienten in den Vordergrund zu stellen. Die Bedeutung von XABCDE (Ausblutungs-?ämorrhagie, Atemwege, Atmung, Kreislauf, Behinderung und Exposition/Umgebung) wird in jedem klinischen Kapitel verstärkt. Die PHTLS, neunte Edition hervorhebt: Aktuelle Informationen zur Flüssigkeitsreanimation und zur Immobilisierung der Wirbelsäule von evidenzbasierter Forschung her und erfahrenen Anbietern präklinischer Behandlung, die die Prinzipien und Praktiken von PHTLS in diesem Bereich anwenden Aktualisierung von Patientenmanagement-Techniken, einschließlich Platzierung von Tourniquets, Nadeldekompressionsstellen, die Verwendung von Beckenbindemitteln, pädiatrischer Flüssigkeitsreanimation und pädiatrischen Atemwegsmanagements Hervorhebung der vermeidbaren Verletzungen, des ablenkenden Fahrens bis hin zum Sturz älterer Erwachsener und der Gewalt von intimen Partnern Konzentration auf zivilen taktischen Bedrohungen und Reaktion von Fahrzeugen als Massenvernichtungswaffen auf ein neues Flussdiagramm für die Fernbewertungsmethodik Dynamische Programmkomponenten Das Haupthandbuch der PHTLS, neunte Edition, ist die definitive Quelle für die Versorgung von Traumata, die die medizinischen Beweise für die empfohlenen Prinzipien und Praktiken des PHTLS-Kurses beschreibt. Als nächster Schritt in der Entwicklung des PHTLS -Programms wird das Haupthandbuch durch das neue PHTLS-Kurshandbuch begleitet, das die wichtigsten Konzepte des Kurses verstärkt und klärt; ein ansprechendes, interaktives Design bietet; und so verfasst ist, dass Sie das Gefühl haben, an einem Gespräch teilzunehmen, anstatt einem Vortrag zuzuhören.

- National Association of Emergency Medical Technicians (Naemt)
2024-01-26

Hace más de tres décadas, PHTLS: Soporte vital en trauma prehospitalario transformó la evaluación y el manejo de pacientes con traumatismos en el campo, mejorando la calidad de la atención de los pacientes con traumatismos y salvando vidas alrededor del mundo. La décima edición de este confiable recurso integral continúa la misión de PHTLS de promover la excelencia en el manejo de los pacientes con traumatismos por parte de todos los profesionales de la atención prehospitalaria mediante la educación global. Desarrollado por primera vez por la National Association of Emergency Medical Technicians (NAEMT) a principios de la década de 1980 en colaboración con el Comité de Traumatología de la American College of Surgeons (ACS-COT), este programa incluye contenido médico actualizado para reflejar el conocimiento y la práctica actuales basados en evidencia. PHTLS promueve el pensamiento crítico como base para brindar atención de calidad, sabiendo que los profesionales de SEM toman las mejores decisiones para sus pacientes cuando se les brinda una base sólida de conocimientos y

principios clave para estimular sus habilidades de pensamiento crítico. Un enfoque claro para evaluar a un paciente con traumatismo En el campo, cada segundo cuenta. La décima edición de PHTLS: Soporte vital en trauma prehospitalario enseña y refuerza los principios para evaluar rápidamente a un paciente con traumatismo utilizando un enfoque ordenado, tratando de inmediato los problemas que ponen en riesgo la vida a medida que se identifican y reduciendo toda demora para iniciar el traslado a un destino adecuado. La décima edición de PHTLS contiene: - Pautas Nacionales actualizadas de Triage sobre el Terreno de pacientes lesionados del ACS - Un debate avanzado sobre los desafíos del tiempo prolongado en la escena - Consideración de cuándo cambiar los esfuerzos de búsqueda y rescate a recuperación en el caso de una víctima de ahogamiento - Pautas de United Kingdom Fire and Rescue (Bomberos y Rescate del Reino Unido) para búsqueda y rescate - Nuevo contenido sobre lesiones causadas por explosiones - Aclaración sobre la función de los inmovilizadores pélvicos - Presentación del rol emergente de la transfusión de sangre prehospitalaria en caso de choque hemorrágico para reducir la mortalidad de 30 días - Contenido actual que aborda consideraciones especiales, incluidas las armas de destrucción masiva y el trauma ambiental Phtls Trauma First Response Pageburst Retail - Naemt 2011-04-28

This is a Pageburst digital textbook; As the required textbook for NAEMT's Trauma First Response course, PHTLS Trauma First Response provides comprehensive, evidence-based trauma guidelines to help you confidently manage trauma patients in the critical moments before EMS arrives on the scene. Culled from the most current, evidence-based trauma treatment guidelines published in NAEMT's internationally renowned Prehospital Trauma Life Support (PHTLS), 7th Edition, this proven approach to trauma management can assist you in providing the best pre-EMS trauma treatment to reduce patient morbidity and mortality. Provides CEUs for First Responders; proceeds from the course go to the NAEMT and are used to support the EMS profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-

alone continuing education course; promotes critical thinking as the foundation for providing quality care. Trauma First Response is a one-day continuing education course that teaches the principles of the world-renowned Prehospital Trauma Life Support (PHTLS) course to those who haven't had advanced prehospital training, including first responders, police officers, firefighters, rescue personnel and safety officers. The lectures and practical stations are designed for the type of care non-EMS first responders can render to trauma patients while awaiting EMS patient transport or when assisting paramedics and EMTs at a trauma scene. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital and first-response-level trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential skills, including: Identifying mechanisms of injury Recognizing life-threatening injuries Assessing and managing trauma patients Performing appropriate first-responder-level interventions Scenarios and Scenario Solutions in each chapter challenge you to apply treatment concepts to realistic situations you may encounter in the field. Includes more information on kinematics than any similar book on the market. A consistent approach helps you easily reference key content. Chapter Objectives and closing Summaries break down must-know information for each chapter. Burn Trauma chapter guides you through the treatment of burn trauma patients. Disaster Management chapter details the latest management techniques and protocols.

Phtls: Soporte Vital de Trauma Prehospitalario, Novena Edición Militar - National Association of Emergency Medical Technicians 2020-05-11

Hace más de tres décadas, PHTLS: Soporte Vital de Trauma Prehospitalario transformó la evaluación y manejo del trauma en el campo. A lo largo de los años y alrededor del mundo, el curso de PHTLS ha mejorado la calidad de la atención al paciente de trauma y ha salvado vidas. La novena edición de este confiable y fidedigno recurso continúa con la misión de PHTLS de promover la excelencia en el manejo de pacientes con trauma por parte de los proveedores involucrados en proporcionar la atención prehospitalaria mediante la educación global. Este legendario programa fue desarrollado por primera vez por la Asociación Nacional de Técnicos en Emergencias Médicas (National Association of Emergency Medical Technicians, NAEMT), a principios de la década de los ochenta del siglo pasado con la cooperación del Comité para el Trauma del Colegio Americano de Cirujanos (American College of Surgeons Committee on Trauma, ACS-COT). Su contenido médico se revisa y actualiza en forma continua para reflejar lo último y más actualizado del conocimiento y la práctica con base en la evidencia. El PHTLS promueve el pensamiento crítico como fundamento para proporcionar una atención de calidad. Basándose en la creencia de que los profesionales de los servicios de emergencias médicas toman las mejores decisiones en beneficio de sus pacientes cuando se les proporciona una base sólida de conocimiento y principios clave para estimular sus habilidades de pensamiento crítico. Desde 1996, la Atención Táctica a Víctimas en Combate (TCCC) ha mejorado el cuidado que se proporciona en los entornos prehospitalarios de combate. La TCCC es el elemento prehospitalario en el campo de batalla del Joint Trauma System, una organización del Departamento de Defensa que proyecta la atención de trauma en combate

hasta el punto de lesiones y seguimiento de cuidado continuo mientras lleva a la víctima a casa para su recuperación y rehabilitación. Las guías de TCCC son revisadas y actualizadas constantemente por el Comité de Atención Táctica a Víctimas de Combate (CoTCCC), un grupo de voluntarios en medicina militar y especialistas en atención de trauma. PHTLS: Soporte Vital de Trauma Prehospitalario, Novena Edición Militar es el siguiente paso en la evolución del programa líder mundial de educación sobre trauma prehospitalario, una asociación entre PHTLS y TCCC que se remonta a la cuarta edición de este curso. Esta edición continúa la misión compartida de promover la excelencia en el tratamiento del trauma por parte de todos los proveedores y en todos los entornos. Además del contenido principal de PHTLS, presenta trece capítulos escritos por militares expertos en la atención de trauma prehospitalario para profesionales en el entorno militar. Éstos incluyen un capítulo dedicado a escenarios detallados diseñados para perfeccionar las habilidades de pensamiento crítico y para ayudar al personal médico de combate a aprender a pensar claramente bajo presión en combate. Un enfoque claro para evaluar al paciente de trauma En el campo, los segundos cuentan. PHTLS: Soporte Vital de Trauma Prehospitalario, edición militar novena enseña y refuerza los principios para evaluar con rapidez al paciente con trauma usando un enfoque ordenado, tratando de inmediato los problemas que ponen en riesgo la vida conforme se van identificando y minimizando cualquier retraso para iniciar transporte a un destino adecuado.

Trauma Life Support transformed the assessment and management of trauma patients in the field, improving the quality of trauma patient care and saving lives around the world. The tenth edition of this trusted, comprehensive resource continues the PHTLS mission to promote excellence in trauma patient management by all prehospital care practitioners through global education. First developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT), this proven program includes updated medical content to reflect current, evidence-based knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care, knowing that EMS practitioners make the best decisions on behalf of their patients when given a solid foundation of knowledge and key principles to fuel their critical-thinking skills. A Clear Approach to Assessing a Trauma Patient In the field, seconds count. The tenth edition of PHTLS: Prehospital Trauma Life Support teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing delays in initiating transport to an appropriate destination. PHTLS, Tenth Edition features:

- The updated ACS National Guidelines for the Field Triage of Injured Patients
- An advanced discussion on the challenges of prolonged scene time
- Consideration of when to shift efforts from search and rescue to recovery in the setting of a drowning victim
- The United Kingdom Fire and Rescue Guidelines for search and rescue
- New content on blast injuries
- Clarification on the role of pelvic binders
- Presentation of the emerging role of prehospital blood transfusion in hemorrhagic shock in reducing 30-day mortality
- Current content addressing special considerations, including weapons of mass destruction and environmental trauma

The PREHOSPITAL TRAUMA LIFE SUPPORT

(PHTLS) course is a unique continuing education program created from the real need in EMS education for additional training in the handling of trauma patients. The course and the book, PREHOSPITAL TRAUMA LIFE SUPPORT, educate EMS personnel to identify, stabilize, treat, and transport trauma patients with the highest level of care. Prehospital patients who are stabilized and then quickly transported to an appropriate medical facility have the best chance of survival. Identifying the mechanism of injury, interpreting signs and symptoms, understanding pathophysiology, recognizing life-threatening injuries, and honing assessment skills all help the EMT to identify a trauma patient with multiple injuries and perform appropriate interventions. PHTLS treats the trauma patient as a special entity, with needs that differ from those of other patients. Provides the most current information available through revised and updated chapters which adhere to the new 1998 ATLS guidelines. Features comprehensive coverage for both basic and advanced level training. Emphasizes the foundation of trauma care, specifically understanding the mechanism of injury. Includes in-depth coverage of anatomy and physiology, pathophysiology, assessment and management of trauma to key body systems and regions. Covers special patient populations, including pediatrics, geriatrics and pregnant patients, to refresh the EMT regarding the importance of understanding the differences in physiology and presentation in these special populations. Contains an entire chapter devoted to trauma care in the military, because prehospital care in military situations is indisputably different than most civilian trauma situations. Promotes clear, practical understanding of the proper procedures for airway and spine skills with separate chapters that outline techniques and procedures with photos alongside text in a step-by-step format. Includes chapter objectives, summary, and review questions to help the student self-assess and pick out key points from the material. Includes case scenarios and conclusions to promote critical thinking and allow the student to see real application of the concepts discussed in each chapter. Provides a comprehensive glossary and bibliography to direct the reader when further study on a particular topic is desired. Incorporates more than 300 full-color

illustrations, many updated and enlarged from previous edition, to aid in visual learning, comprehension of material, explanation of difficult concepts, and keep reader's interest.

PHTLS: Prehospital Trauma Life Support, Military Edition - National Association of Emergency Medical Technicians 2019-10

PHTLS: Prehospital Trauma Life Support, Military Edition consists of the PHTLS core content and features thirteen chapters written by military prehospital trauma care experts for practitioners in the military environment. PHTLS: Prehospital Trauma Life Support, Military Edition is created in partnership between the National Association of Emergency

PHTLS - Prehospital Trauma Life Support - Naemt 2011-02-25

This is a Pageburst digital textbook; As the required textbook for NAEMT's worldwide prehospital trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality. Tailored expressly for the military environment, this book diverges in the last 12 chapters to reflect the special considerations of the military. These unique chapters are written by the Tactical Combat Casualty Care Committee on Trauma, the leading body that oversees trauma care. The Instructor's Electronic Resource CD-ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Provides CEUs for military prehospital care providers, first responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession;

helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system makes it easy to reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. Three new Military Medicine chapters add to coverage for the military environment: Joint Theater Trauma System, Treatment of Burn Casualties in TCCC, and TCCC Casualty Response Planning. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 20 fully re-shot demonstrations and four brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy; subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)). Extensively updated photos clarify key concepts and techniques. New Art and

Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course.

USMC Tactical Combat Casualty Care (TCCC / TC3) Guidelines - 2013-10-28

Tactical Combat Casualty Care Guidelines 28 October 2013 * All changes to the guidelines made since those published in the 2010 Seventh Edition of the PHTLS Manual are shown in bold text. The most recent changes are shown in red text. * These recommendations are intended to be guidelines only and are not a substitute for clinical judgment. Basic Management Plan for Care Under Fire 1. Return fire and take cover. 2. Direct or expect casualty to remain engaged as a combatant if appropriate. 3. Direct casualty to move to cover and apply self-aid if able. 4. Try to keep the casualty from sustaining additional wounds. 5. Casualties should be extricated from burning vehicles or buildings and moved to places of relative safety. Do what is necessary to stop the burning process. 6. Airway management is generally best deferred until the Tactical Field Care phase. 7. Stop life-threatening external hemorrhage if tactically feasible: - Direct casualty to control hemorrhage by self-aid if able. - Use a CoTCCC-recommended tourniquet for hemorrhage that is anatomically amenable to tourniquet application. - Apply the tourniquet

proximal to the bleeding site, over the uniform, tighten, and move the casualty to cover.

PHTLS: Prehospital Trauma Life Support for First Responders Course Manual - National Association of Emergency Medical Technicians (NAEMT) 2019-12

In the field, seconds count. PHTLS: Prehospital Trauma Life Support for First Responders, Second Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Developed by the National Association of Emergency Medical Technicians (NAEMT) in cooperation with the American College of Surgeons Committee on Trauma (ASC-COT), PHTLS for First Responders, Second Edition reflects current, evidence-based knowledge and practice, and promotes critical-thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life-saving care is at the heart of PHTLS for First Responders, Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this, PHTLS for First Responders, Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE (eXsanguinating hemorrhage, airway, breathing, circulation, disability, and expose/environment) is reinforced in every clinical chapter. PHTLS for First Responders, Second Edition features a new course manual, which reinforces and clarifies key concepts from the course; features an engaging, interactive design; and is written so you feel like you are participating in a conversation, versus listening to a lecture.
