In the Bubble - John Thackara 2006-02-17

How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if "tech" ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? *In the Bubble* is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not

in a remote science fiction future; it's not about, as he puts it, "the schlock of the new" but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. *In the Bubble* describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of *In the Bubble* is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

The Sound of Innovation - Andrew J. Nelson 2015-03-06

How a team of musicians, engineers, computer scientists, and psychologists developed computer music as an academic field and ushered in the era of digital music. In the 1960s, a team of Stanford musicians, engineers, computer scientists, and psychologists used computing in an entirely novel way: to produce and manipulate sound and create the sonic basis of new musical compositions. This group of interdisciplinary researchers at the nascent Center for Computer Research in Music and Acoustics (CCRMA, pronounced "karma") helped to develop computer music as an academic field, invent the technologies that underlie it, and usher in the age of digital music. In The Sound of Innovation, Andrew Nelson chronicles the history of CCRMA, tracing its origins in Stanford's Artificial Intelligence Laboratory through its present-day influence on Silicon Valley and digital music groups worldwide. Nelson emphasizes CCRMA's interdisciplinarity, which stimulates creativity at the intersections of fields; its commitment to open sharing and users; and its pioneering commercial engagement. He shows that Stanford's outsized influence on the

emergence of digital music came from the intertwining of these three modes, which brought together diverse supporters with different aims around a field of shared interest. Nelson thus challenges long-standing assumptions about the divisions between art and science, between the humanities and technology, and between academic research and commercial applications, showing how the story of a small group of musicians reveals substantial insights about innovation. Nelson draws on extensive archival research and dozens of interviews with digital music pioneers; the book's website provides access to original historic documents and other material.

Performance Artists Talking in the Eighties - Linda M. Montano 2023-09-01

Performance artist Linda Montano, curious about the influence childhood experience has on adult work, invited other performance artists to consider how early events associated with sex, food, money/fame, or death/ritual resurfaced in their later work. The result is an original and compelling talking performance that documents the production of art in an important and often misunderstood community. Among the more than 100 artists Montano interviewed from 1979 to 1989 were John Cage, Suzanne Lacy, Faith Ringgold, Dick Higgins, Annie Sprinkle, Allan Kaprow, Meredith Monk, Eric Bogosian, Adrian Piper, Karen Finley, and Kim Jones. Her discussions with them focused on the relationship between art and life, history and memory, the individual and society, and the potential for individual and social change. The interviews highlight complex issues in performance art, including the role of identity in performer-audience relationships and art as an exploration of everyday conventions rather than a demonstration of virtuosity.

The Modern Snare Drummer - Ron Spagnardi 1999-01-01 (Book). From the editor of Modern Drummer magazine, this book is a collection of 38 solos designed to challenge both technical and reading skills for the intermediate to advanced snare drummer. Each solo is preceded by an explanation of its structure and highlights, with an emphasis on the more difficult sections of the piece. Also includes some suggested stickings, and a special section of 30 Preparatory Exercises.

The New Yorker - 2005

WWII & NYC - Kenneth T. Jackson 2012

Published in conjunction with the ground breaking exhibition WWII & NYC at the New-York Historical Society, this fascinating book captures the little-told but epic story of New York in the years 1939-1945, the war's impact on the metropolis, and the challenges New

Yorkers faced in a city mobilised for war.

All the Lives I Want - Alana Massey 2017-02-07

"Alana Massey's prose is to brutal honesty what a mandolin is to a butter knife: she's sharper; she slices thinner; she shows the cross-section of a truth so deftly--so powerfully and cannily--it's hard to look away, and hard not to feel that something has shifted in you for having read her." -- Leslie Jamison, New York Times bestselling author of *The Empathy Exams* From columnist and critic Alana Massey, a collection of essays examining the intersection of the personal with pop culture through the lives of pivotal female figures--from Sylvia Plath to Britney Spears--in the spirit of Chuck Klosterman, with the heart of a true fan. Mixing Didion's affected cool with moments of giddy celebrity worship, Massey examines the lives of the women who reflect our greatest aspirations and darkest fears back onto us. These essays are personal without being confessional and clever in a way that invites readers into the joke. A cultural critique and a finely wrought fan letter, interwoven with stories that are achingly personal, *All the Lives I Want* is also an exploration of mental illness, the sex industry, and the dangers of loving too hard. But it is, above all, a paean to the celebrities who have shaped a generation of women--from Scarlett Johansson to Amber Rose, Lil' Kim, Anjelica Huston, Lana Del Rey, Anna Nicole Smith and many more. These reflections aim to reimagine these women's legacies, and in the process, teach us new ways of forgiving ourselves.

Nine - Maury Yeston 1983

Genius Foods - Max Lugavere 2018-03-20

New York Times Bestseller Discover the critical link between your brain and the food you eat and change the way your brain ages, in this cutting-edge, practical

guide to eliminating brain fog, optimizing brain health, and achieving peak mental performance from media personality and leading voice in health Max Lugavere. After his mother was diagnosed with a mysterious form of dementia, Max Lugavere put his successful media career on hold to learn everything he could about brain health and performance. For the better half of a decade, he consumed the most up-to-date scientific research, talked to dozens of leading scientists and clinicians around the world, and visited the country's best neurology departments—all in the hopes of understanding his mother's condition. Now, in *Genius Foods*, Lugavere presents a comprehensive guide to brain optimization. He uncovers the stunning link between our dietary and lifestyle choices and our brain functions, revealing how the foods you eat directly affect your ability to focus, learn, remember, create, analyze new ideas, and maintain a balanced mood. Weaving together pioneering research on dementia prevention, cognitive optimization, and nutritional psychiatry, Lugavere distills groundbreaking science into actionable lifestyle changes. He shares invaluable insights into how to improve your brain power, including the nutrients that can boost your memory and improve mental clarity (and where to find them); the foods and tactics that can energize and rejuvenate your brain, no matter your age; a brain-boosting fat-loss method so powerful it has been called "biochemical liposuction"; and the foods that can improve your happiness, both now and for the long term. With *Genius Foods*, Lugavere offers a cutting-edge yet practical road map to eliminating brain fog and optimizing the brain's health and performance today—and decades into the future.

Pim & Francie - Al Columbia 2017-01-25

Collecting more than a decade's worth of excavations, comic strips, animation stills, storybook covers, and much more, this broken jigsaw puzzle of a graphic novel tells the story of Pim & Francie - childlike male and female imps - whose irresponsible antics get them into horrific, fantastic trouble. The brilliant, fairy tale-

like backdrops hint at further layers of reality lurking under every gingerbread house or behind every sunny afternoon. Their loosely defined relationship only contributes to the existential fear that lingers underneath the various perils they are subjected to, which are threaded together by text and notes by the artist.

The Annotated Alice - Lewis Carroll 1998

A fully annotated and illustrated version of both ALICE IN WONDERLAND and THROUGH THE LOOKING GLASS that contains all of the original John Tenniel illustrations. From "down the rabbit hole" to the Jabberwocky, from the Looking-Glass House to the Lion and the Unicorn, discover the secret meanings hidden in Lewis Carroll's classics. (Orig. \$29.95)

This Day in Music - Neil Cossar 2014-08

The Public Domain - James Boyle 2016-09-06

Please read the legal notice included in this e-book and/or check the copyright status in your country. In this enlightening book James Boyle describes what he calls the range wars of the information age-today's heated battles over intellectual property. Boyle argues that just as every informed citizen needs to know at least something about the environment or civil rights, every citizen should also understand intellectual property law. Why? Because intellectual property rights

mark out the ground rules of the information society, and today's policies are unbalanced, unsupported by evidence, and often detrimental to cultural access, free speech, digital creativity, and scientific innovation. Boyle identifies as a major problem the widespread failure to understand the importance of the public domain—the realm of material that everyone is free to use and share without permission or fee. The public domain is as vital to innovation and culture as the realm of material protected by intellectual property rights, he asserts, and he calls for a movement akin to the environmental movement to preserve it. With a clear analysis of issues ranging from Jefferson's philosophy of innovation to musical sampling, synthetic biology and Internet file sharing, this timely book brings a positive new perspective to important cultural and legal debates. If we continue to enclose the "commons of the mind," Boyle argues, we will all be the poorer.

The Life and Letters of William Sharp and "Fiona Macleod". Volume 1: 1855-1894 – William F. Halloran
2018-11-27

William Sharp (1855-1905) conducted one of the most audacious literary deceptions of his or any time. Sharp was a Scottish poet, novelist, biographer and editor who in 1893 began to write critically and commercially successful books under the name Fiona Macleod. This was far more than just a pseudonym: he corresponded as Macleod, enlisting his sister to provide the handwriting and address, and for more than a decade "Fiona Macleod" duped not only the general public but such literary luminaries as William Butler Yeats and, in America, E. C. Stedman. Sharp wrote "I feel another self within me now more than ever; it is as if I were possessed by a spirit who must speak out". This three-volume collection

brings together Sharp's own correspondence – a fascinating trove in its own right, by a Victorian man of letters who was on intimate terms with writers including Dante Gabriel Rossetti, Walter Pater, and George Meredith – and the Fiona Macleod letters, which bring to life Sharp's intriguing "second self". With an introduction and detailed notes by William F. Halloran, this richly rewarding collection offers a wonderful insight into the literary landscape of the time, while also investigating a strange and underappreciated phenomenon of late-nineteenth-century English literature. It is essential for scholars of the period, and it is an illuminating read for anyone interested in authorship and identity.

Rise of the Robots – Martin Ford 2015-05-05

The New York Times–bestselling guide to how automation is changing the economy, undermining work, and reshaping our lives Winner of Best Business Book of the Year awards from the Financial Times and from Forbes "Lucid, comprehensive, and unafraid...;an indispensable contribution to a long-running argument."--Los Angeles Times What are the jobs of the future? How many will there be? And who will have them? As technology continues to accelerate and machines begin taking care of themselves, fewer people will be necessary. Artificial intelligence is already well on its way to making "good jobs" obsolete: many paralegals, journalists, office workers, and even computer programmers are poised to be replaced by robots and smart software. As progress continues, blue and white

collar jobs alike will evaporate, squeezing working- and middle-class families ever further. At the same time, households are under assault from exploding costs, especially from the two major industries—education and health care—that, so far, have not been transformed by information technology. The result could well be massive unemployment and inequality as well as the implosion of the consumer economy itself. The past solutions to technological disruption, especially more training and education, aren't going to work. We must decide, now, whether the future will see broad-based prosperity or catastrophic levels of inequality and economic insecurity. Rise of the Robots is essential reading to understand what accelerating technology means for our economic prospects—not to mention those of our children—as well as for society as a whole.

The Roots Of The Blues – Samuel Charters 1991-08-22

I went to Africa to find the roots of the blues. So Samuel Charters begins the extraordinary story of his research. But what began as a study of how the blues was handed down from African slaves to musicians of today via the slave ships, became something much more complex. For in Africa Samuel Charters discovered a music which was not just a part of the past but a very vital living part of African culture. The Roots of the Blues not only reveals Charters's remarkable talent in discussing African folk music and its relationship with American blues; it demonstrates his power as a descriptive and narrative writer. Using extensive quotations of song lyrics and some remarkable photographs of the musicians, Charters has created a unique contribution to our understanding of both African and American cultures and their music.

Happiness Is a Choice You Make – John Leland 2018-01-23

A New York Times Bestseller! An extraordinary look at what it means to grow old and a heartening guide to well-being, *Happiness Is a Choice You Make* weaves together the stories and wisdom of six New Yorkers who number among the “oldest old”—those eighty-five and up. In 2015, when the award-winning journalist John Leland set out on behalf of The New York Times to meet members of America's fastest-growing age group, he anticipated learning of challenges, of loneliness, and of the deterioration of body, mind, and quality of life. But the elders he met took him in an entirely different direction. Despite disparate backgrounds and circumstances, they each lived with a surprising lightness and contentment. The reality Leland encountered upended contemporary notions of aging, revealing the late stages of life as unexpectedly rich

and the elderly as incomparably wise. Happiness Is a Choice You Make is an enduring collection of lessons that emphasizes, above all, the extraordinary influence we wield over the quality of our lives. With humility, heart, and wit, Leland has crafted a sophisticated and necessary reflection on how to “live better”—informed by those who have mastered the art.

Music, Lyrics, and Life - Mike Errico 2021-11-15

Music, Lyrics, and Life is the songwriting class you always wish you'd taken, taught by the professor you always wish you'd had. It's a deep dive into the heart of questions asked by songwriters of all levels, from how to begin journaling to when you know that a song is finished. With humor and empathy, acclaimed singer-songwriter Mike Errico unravels both the mystery of songwriting and the logistics of life as a songwriter. For years, this set of tools, prompts, and ideas has inspired students on campuses including Yale, Wesleyan, Berklee, Oberlin, and NYU's Clive Davis Institute of Recorded Music. Alongside his own lessons, Errico interviews the writers, producers, and A&R executives behind today's biggest hits and investigates the larger questions of creativity through lively conversations with a wide range of innovative thinkers: astrophysicist Janna Levin explains the importance of repetition, both in choruses and in the exploration of the universe; renowned painter John Currin praises the constraints of form, whether it's within a right-angled canvas or a three-minute pop song; bestselling author George Saunders unpacks the hidden benefit of writing, and revising, authentically; and much more. The result is that Music, Lyrics, and Life ends up revealing as much about the art of songwriting as it does about who we are, and where we may be going. This is a book for songwriters, future content creators, music lovers, and anyone who wants to understand how popular art forms are able to touch us so deeply. Mike Errico has honed these lessons over years of writing, performing, teaching, and mentoring, and no matter where you are on your songwriting journey, Music, Lyrics, and Life will help

you build a creative world that's both intrinsic to who you are, and undeniable to whoever is listening.

Rationalizing Culture - Georgina Born 2023-09-01

Anthropologist Georgina Born presents one of the first ethnographies of a powerful western cultural organization, the renowned Institut de Recherche et de Coordination Acoustique/Musique (IRCAM) in Paris. As a year-long participant-observer, Born studied the social and cultural economy of an institution for research and production of avant-garde and computer music. She gives a unique portrait of IRCAM's composers, computer scientists, technicians, and secretaries, interrogating the effects of the cultural philosophy of the controversial avant-garde composer, Pierre Boulez, who directed the institute until 1992. Born depicts a major artistic institution trying to maintain its status and legitimacy in an era increasingly dominated by market forces, and in a volatile political and cultural climate. She illuminates the erosion of the legitimacy of art and science in the face of growing commercial and political pressures. By tracing how IRCAM has tried to accommodate these pressures while preserving its autonomy, Born reveals the contradictory effects of institutionalizing an avant-garde. Contrary to those who see postmodernism representing an accord between high and popular culture, Born stresses the continuities between modernism and postmodernism and how postmodernism itself embodies an implicit antagonism toward popular culture.

You Shook Me All Campaign Long - Eric T. Kasper 2018-11-15

Music has long played a role in American presidential campaigns as a mode of both expressing candidates' messages and criticizing the opposition. The relevance of music in the 2016 campaign for the White House took various forms in a range of American media: a significant amount of popular music was used by campaigns, many artist endorsements were sought by candidates, ever changing songs were employed at rallies, instances of musicians threatening legal action against candidates burgeoned, and artists and others increasingly used music as a form of political protest before and after Election Day. The 2016 campaign was a game changer, similar to the development of music in the 1840 campaign, when "Tippecanoe and Tyler Too" helped sing William Harrison into the White House. The ten chapters in this collection place music use in 2016 in historical perspective before examining musical messaging, strategy, and parody. The book ultimately explores causality: how do music and musicians affect presidential elections, and how do politicians and campaigns affect music and musicians? The authors explain this interaction from various perspectives, with methodological approaches from several fields, including political science, legal studies, musicology, cultural studies, rhetorical studies, and communications and journalism. These chapters will help the reader understand music in the 2016 election to realize how music will be relevant in 2020 and beyond.

The Sound of Music Story - Tom Santopietro 2015-02-17
 On March 2, 1965, "The Sound of Music" was released in the United States and the love affair between moviegoers and the classic Rodgers and Hammerstein musical was on. Rarely has a film captured the love and imagination of the moviegoing public in the way that "The Sound of Music" did as it blended history, music, Austrian location filming, heartfelt emotion and the yodeling of Julie Andrews into a monster hit. Now, Tom Santopietro has written the ultimate "Sound of Music" fan book with all the inside dope from behind the scenes stories of the filming in Austria and Hollywood to new interviews with Johannes von Trapp and others. Santopietro looks

back at the real life story of Maria von Trapp, goes on to chronicle the sensational success of the Broadway musical, and recounts the story of the near cancellation of the film when the "Cleopatra" bankrupted 20th Century Fox. We all know that Julie Andrews and Christopher Plummer played Maria and Captain Von Trapp, but who else had been considered? Tom Santopietro knows and will tell all while providing a historian's critical analysis of the careers of director Robert Wise and screenwriter Ernest Lehman, a look at the critical controversy which greeted the movie, the film's relationship to the turbulent 1960s and the super stardom which engulfed Julie Andrews. Tom Santopietro's "The Story of 'The Sound of Music'" is book for everyone who cherishes this American classic.
